

# Microcosms

## FUNSHEET

# 3

Find a spot in the house, safely get low to the floor. Take a look around.

How does it look different than the way you usually see around you?  
Can you see under things you don't usually see?

Does the carpet or grass, or whatever the surface is under you look different close up?

What do you notice the most?

What would life be like if you were only 6 inches tall? Describe it and create an art piece to show what it would be like.

When working on any of the fun sheets, always make sure you are being aware of your surroundings and not attempting anything dangerous. Children should be supervised by an adult while participating.
