FUNSHEET

Move about your house and take notice of all of the different things that use electricity.

Lights, tv, computer, fridge stove,
etc.

Look all around make a list of all of the items that use electricity

How many items are really important?

How many could you do without?

Now what would you do if we had no electricity – how would the world look

What would you do at night?

Use you imagination to go back to a time when we didn't have electricity. What will you create – does it need electricity? Like your computer? Tricky eh?

When working on any of the fun sheets, always make sure you are being aware of your surroundings and not attempting anything dangerous. Children should be supervised by an adult while participating.
